Having a coach from WLA has helped me put a microscope on the things I need to work on as a leader. Which we then worked through in a proactive way. It's helped me catch those opportunities to improve that I might not have seen.

Tailored Coaching to Help School Leaders Thrive

The School Leadership Coaching model integrates the Instructional Coaching Cycle and the GROW/GROWTH coaching model to provide a powerful educational lens for all coaching sessions.

Our approach is also informed by the Australian Professional Standards for Teachers and/or the Australian Professional Standards for Principals, which will further contextualise the coaching conversations.

Combined, these various lens and models will scaffold and guide all conversations between the coach and coachee as they work together to identify goals, plan strategies, and monitor progress and growth.

The School Leadership Coaching approach combines the Instructional Coaching Cycle and the GROW/GROWTH coaching model in the following way:

IDENTIFY:

G: Goals - what will you need to achieve?

R: Reality - what is happening now?

LEARN:

O: Options - what could you do?

W: Will - what will you do?

IMPROVE:

T: Tactics - how and when will you do it?

H: Habits - how will you sustain your success?
